

Want Healthy Calves? Give Them Seconds.

Research supports that a 2L **second feeding of colostrum**, within 8 - 12 hours of birth, may result in **improved health and lifetime production benefits** for the calf.¹

1. Weina Shi. 2014. Influence of Colostrum Feeding Programs on Passive Immunity, Growth Performance and Serum Biochemical Parameters in Holstein Dairy Calves (Thesis). China Agricultural University.

2L Kit includes:

- 50 2L Perfect Udder® Colostrum Management Bags
- 3 Esophageal Feed Tubes
- 3 Nipples
- 1 Nipple Assembly Tool
